

about AtoZec

Hello and welcome to AtoZec, my environmental consulting business focused on wildlife surveys in Arizona and the Southwest, as well as numerous biological and NEPA services. These include preconstruction, species-specific and native plant surveys, biological monitoring, Section 7 consultation, NEPA management and documents and everything in-between.

I've worked in environmental consulting as a Biologist and Environmental Planner for 10 years, both for a government agency and large consulting firm. My project experience has spanned numerous industries and habitats west of the Mississippi. As a small business, I can provide my knowledge and skills with a cost effective and efficient approach. My goal is to move the environmental permitting process forward in an accurate, timely, and legally defensible manner.

I work hard to do the job right and help move your project along in accordance with environmental laws. I enjoy what I do and value the many relationships that grow from it.

what's Inside

Inside you'll find a general list of my services and qualifications. If you have questions on any of them, please don't hesitate to ask. By no means is my experience limited to what's listed; if there are services you require and don't see, no worries, just let me know. If it's something I don't do, I'll get you in touch with the right people. If you're interested in teaming on a proposal or in need of a reliable sub-consultant, AtoZec can help. If you just have questions about the environmental process or your needs, I'm happy to chat and offer advice.

I appreciate you taking the time to flip through this and hope to hear from you in the future. Take a trip over to the website for more information or simply just to view some wildlife photos of the wonderful Southwest.

Thanks, Eric
